Sheet, wire, pipe and other in-line galvanizing members dedicate their plants to the galvanizing of their own products.

- Note:**
- Where more than one galvanizing line is available, the number of lines and the significant bath dimensions are listed, ie. widest, longest and deepest.
 - For specific contact names (e.g. sales or production personnel) and mobile telephone numbers, contact company receptionist.
 - The bath sizes are inside dimensions and not maximum component size (length, width and depth). Kindly take note of the expansion of the component when dipped into molten zinc, or discuss with relevant galvanizer.
